Summary

AI Automation Engineer focused on n8n workflows and LLM-based agents. Skilled in building automated systems integrating APIs, data pipelines, and intelligent decision-making.

Projects

- **AI Automation System (n8n + LLM)**
 - Built n8n workflows for automated communication and task execution
 - Integrated Google Sheets, APIs, and webhooks for real-time processing
 - Developed LLM agent for personalized email generation
- **Multi-Agent Workflow System (LangGraph + n8n)**
 - Designed multi-agent system for task coordination and automation
 - Used n8n to trigger and orchestrate agent workflows
- **AI Automation Bot**
 - Built n8n-based bot to automate user interaction and workflows
 - Integrated APIs and LLMs for real-time response generation

Experience

- **Research Intern** March 2026 – Present
Peer Research Lab Remote
 - Worked on AI-driven automation systems and pipelines
 - Built and evaluated intelligent workflows and models

Skills

Programming: Python

Automation: n8n, APIs, Webhooks, Workflow Design

AI/LLMs: Agents, Prompt Engineering, RAG

Frameworks: LangChain, LangGraph, Hugging Face

Tools: Git, JSON, FAISS

Achievements

- Champion – Programming Contest, DIU
- Champion – Hackathon (Fall Fest 2024)
- Solved 300+ problems on Codeforces

Education

- **B.Sc. Computer Science & Engineering** 2022 – Present
Dhaka International University
