LeetCode: leetcode.com/younusalinahid

Summary

Motivated and detail-oriented Computer Science & Engineering student with hands-on experience in backend development using Spring Boot and practical frontend exposure in Angular and React. Passionate about building scalable backend systems, REST APIs, and solving real-world software engineering problems.

Skills

Programming: Java, JavaScript, C
Backend: Spring Boot, REST API, JPA, Hibernate
Frontend: React, Angular
Database: MySQL, SQL
Testing: JUnit, Mockito, Integration Testing
Tools: GitHub, IntelliJ IDEA

Experience

- **Software Engineer** **Aug 2024 – Present**
Remote
 Avanto VR Solution GmbH
 - Developing and maintaining scalable backend services using Spring Boot
 - Designed and implemented the ESYSYNC dashboard for 3,000+ customers, improving usability and overall user experience
 - Implemented multiple background jobs using Spring Scheduler for automation and system efficiency
 - Built customer routing and real-time location heartbeat features for enhanced tracking and system monitoring
 - Developed AI-powered interior design feature FEELESTATE across both frontend and backend systems
 - Contributed to frontend development using Angular, improving UI responsiveness and user experience

Projects

- **ShopSpot E-commerce**
 - Developed a full-stack e-commerce application using React and Spring Boot
 - Implemented product listing, cart management, secure checkout, and JWT authentication
 - Integrated MySQL database and RESTful APIs
- **Student Result System**
 - Built a grading management system using Spring Boot
 - Designed database schema for student records and semester results
 - Implemented unit testing using JUnit and Mockito
- **E-commerce Application**
 - Built secure REST APIs with pagination, sorting, and filtering
 - Designed database schema using JPA and Hibernate
 - Implemented custom exception handling and request validation
- **Global Exception Handling System**
 - Implemented centralized exception handling in a Spring Boot application using @ControllerAdvice
 - Designed custom exception classes and structured error responses for better API consistency
 - Improved error handling by returning meaningful HTTP status codes and messages
 - Enhanced application reliability and debugging through standardized error management

Publications

- **[PaniCord: An IoT-Based Emergency Alert System Using ESP32 for Real-Time Location Tracking]**
 Accepted at ECCT 2026 (International Conference), Dhaka International University

Education

- **B.Sc. Computer Science & Engineering** **Expected Graduation: August 2026**
 Dhaka International University
